

E/One Sentry Advisor 2.0

Pressure Sewer Monitoring System

E/One Sentry Advisor sets the benchmark for pressure sewer system monitoring with an enhanced platform.

With the addition of E/One Sentry Advisor, E/One completes the requirements for pressure sewer systems that today's industry requires and adds service predictability to the most reliable grinder pump on the market.

Your time is valuable and resources are limited. E/One Sentry Advisor can monitor your system, help reduce the number of emergency service call-outs and even predict service needs.

Features and Benefits

- Monitors pump performance and records every start, run time duration and stop of each grinder pump on the system
- Automatically send alarm conditions to service personnel
- Mapping feature shows the location of each asset in the system — from a few stations to hundreds
- Use reports to review system performance and spot data trends for proactive servicing

**Monitor and protect your system with
E/One Sentry Advisor 2.0**

SPECIFICATIONS

E/One Sentry Advisor is available with all E/One Sentry alarm panels. Standalone kits are available for non-E/One applications.

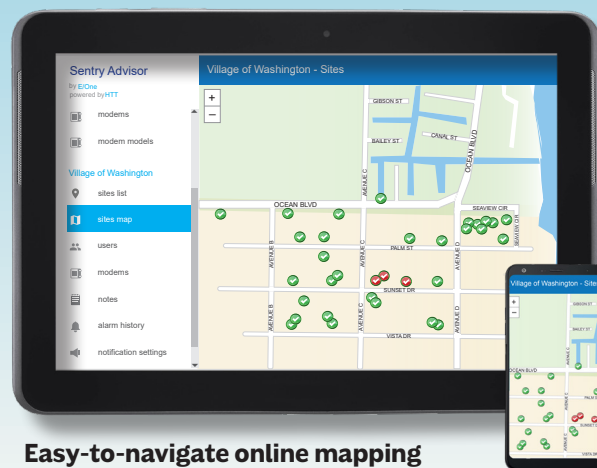

STANDARD PACKAGE FEATURES

- Includes all necessary components and wiring — cellular modem, internal antenna (optional external antenna), auxiliary power supply, and dry contacts for both high level alarm and pump running
